Thermoacoustic insulation from polyethylene foam with closed cell structure

MIRELON® AKUSTIK is a hose designed for thermoacoustic insulation of water drain.

MIRELON® AKUSTIK is an ideal thermal insulation material for new buildings, adaptations and renovations due to its excellent thermal insulation properties, flexibility and easy workability.

MISAPPLICATION:

- Thermal insulation of low and high pressure steam distribution systems
- Outdoor instalation without surface protection against weathering and UV radiation
- Instalation in places where the ambient temperature exceeds 90°C

Technical data:

- non-laminated design
- wall thickness: 5 mm (according to EN 14313:2009+A1:2013)
- diameter: from 75 to 160 cm (according to EN 14313:2009+A1:2013)
- length: 15 m (according to EN 14313:2009+A1:2013)
